

Mexico

Dr. Lee Pearson, D.V.M. and owner of Cheshire Animal Hospital has been traveling to Mexico on the Baja for his semiannual “spaycation” every February and November for the past 7 years.

He performs spays and neuters on underserved dogs and cats in Todos Santos, Baja California Sur, Mexico, working with groups of veterinarians and veterinary technicians from Colorado. Dr. Pearson has the opportunity to mentor the students from Colorado State University, College of Veterinary Medicine as everyone is hands on performing these surgeries.

The team of doctors and technicians can spay and neuter over 200 dogs and cats in just 3 working days. Dr. Lee Pearson leaves for Mexico, February 4th, 2016.
